SUMMARY

I am passionate about developing seamless user-friendly web applications. My technical skills include HTML, CSS, JavaScript, React JS, Node Js, Express JS, MongoDB and other frameworks. I have honed these skills as a Full Stack Developer Intern at Technical Hub, where I actively contributed to various robust applications.

EDUCATION

B. TECH, Electronics and Communication Engineering

Aditya College of Engineering, Surampalem

May 2024

8.03 CGPA

TECHNICAL SKILLS

Web Development	Html, CSS, JavaScript, Node Js
Frameworks/Library	React Js, Express Js, Bootstrap, Tailwind CSS, Redux-toolkit
Programming	Python, Java, C++
Databases	MongoDB, MYSQL

WORK EXPERIENCE

Technical Hub: Full Stack Developer Intern

Jun 2023 – Aug 2023

- I immersed myself in a dynamic learning environment, refining both front-end and back-end. Collaborating on diverse projects.
- I actively contributed to the creation of robust applications, utilizing HTML, CSS, JavaScript, React Js, Node Js, and MongoDB Database.

PERSONAL PROJECTS

Car Rental Website

Feb 2023 – Mar 2023

- This innovative real-time car rental application offers a seamless user experience. [GitHub](#)
- Users have the convenience to create their accounts, effortlessly book their preferred vehicles, and effortlessly manage their booking details. [Try It!](#)

Personal Portfolio Website

Dec 2023

- Personal portfolio website is a digital platform that showcases my skills, accomplishments, and experiences. [GitHub](#)
- It serves as an online resume and portfolio, allowing professionals to highlight their work to potential employers, clients, or collaborators. [Try It!](#)

Netflix Landing Page Clone

Feb 2023

- This project is a clone of the Netflix landing page, designed to mimic the appearance of the original landing page. [GitHub](#)
- The goal is to create a visually appealing and responsive web page that showcases the key features of the Netflix UI, providing an engaging user experience similar to the actual Netflix interface. [Try It!](#)

URL Shortener

Mar 2024

- This application is made using Node Js, Express and MongoDB database along with server-side rendering ejs. [GitHub](#)
- It shortens long URLs into unique, shorter links. Redirect users to original URLs when they visit the shorten link.
- It also tracks the number of times a shortened link has been visited.

CERTIFICATIONS

- I have successfully completed the **JavaScript** certification from IT specialist.
- I have successfully completed the Programming Essentials in **Python** from Cisco Networking Academy.
- I completed the **Java** Foundations course and obtained a certificate from Oracle Academy.

ACHIEVEMENTS

- I Completed over 500+ problem-solving challenges on Leet Code and GeeksForGeeks platforms.
- When I was studying SSC, I ranked second in my school.
